Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a multi-perforated collagen film, classified in class 428.
- II. Claims 12-17, drawn to a method of perforating a collagen film, classified in class 425.
- III. Claims 18 and 19, drawn to a method of wrapping and netting a foodstuff, classified in class 53.
- IV. Claim 20, drawn to a cooked or uncooked netting product, classified in class 426.

The inventions are independent or distinct, each from the other because:

The multi-perforated film of Group I can be made by methods other than that recited in Group II. For example, the perforated film could be made by mechanical means. Also, the film of Group I could be used in products other than that recited in Group IV or methods recited in Group III. For example, the film could be used in a product or method that does not require a netting. Also, the collagen film can be used in non-food applications such as pharmaceutical and medical applications such as a vehicle for drug delivery or a wound covering.

Further, if Group II is elected, an election of one of the following species is further required as follows:

Species IIIA, wherein the stuffing in the film and the netting occur at the same time;

Species IIIB, wherein the stuffing in the film occurs first and the netting occurs thereafter.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art, requiring separate searches, as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven L. Weinstein whose telephone number is 571-272-1410. The examiner can normally be reached on Monday-Friday 7:00 A.M.-2:30 P.M..
